DAY TRIPS HOLIDAYS UK & EUROPEAN COACH HIRE

Tuesday, 14 July 2020

VEHICLE SANITISATION POLICY

We have chosen to use a spray called X-Mist which has been tested in independent Labourites and has been given BS standard approvals for its germ control capabilities – BS EN 1276, BS EN 1650 and **BS EN 14476**.

Written facts include;

- Kills Covid 19 on Contact - alcohol content is over 80% and a log kill rate of 6, far in excess of the Government's 61% and log kill 3 guideline for total effectiveness against the airborne virus.
- Contains a Secondary broad spectrum germicide that remains active for **up to 7 days on the surfaces it lands on**, killing viruses and germs far more resilient than Covid 19, including hard to access areas.
- The microscopic coating will eliminate 99.9998% of germs, bacteria and viruses and will continue to kill on contact should the surface be re-contaminated by touch or droplets. Rooms are re-useable in 1 hour, transport vehicles can be fully treated and ready to re-use in 20 minutes.

All our vehicles that are in use will receive X-Mist treatment to ensure the safety of our staff and passengers.
